TECHNICAL SKILLS

JavaScript, React / Redux, HTML, CSS, SASS, Node.js, Git, Jest / Enzyme, Google Cloud, Material Design, Chrome Ext. Development, React Native, RESTful API, Express, Heroku

EXPERIENCE

Consulting @ Apple
Jan 2021 - Present

React Engineer
- Worked on tight deadlines within an Agile team to deliver new features & provide bug-fixes for an internal React app
- Translated mockups into code - enhanced user experience by revamping UI
- Used debugging skills to check / enhance code, & improve functionality
- Effectively communicated engineering ideas / rationale to stakeholders - utilizing language accessible to all levels of technical knowledge
- Contributed to & followed best practices for top-quality software development

Super Boss Mode
Jun 2020 - Dec 2020

React Engineer
- Incorporated React & Redux in a Remote Gaming Job Board app with Material-UI which was then integrated with teammate's back-end
- Implemented Responsive Web Design (RWD) using Media Queries
- Collaborated with a global remote team - which included a Senior Developer & Product Manager

Liquidaty
Mar 2020 - Aug 2020

Solutions Engineer
- Provided main platform technical troubleshooting with Liquidaty Functions, CLI tools, etc
- Authored product docs using MkDocs (User Manual, Installation, Sys Admin Guide, etc)
- Created Bash testing scripts (with corresponding Makefile commands)
- Worked on converting JavaScript to TypeScript in codebase

PROJECTS

Sebra - won 1st place in global Libra hackathon
https://sebra-client.herokuapp.com / Get it on the Chrome Web Store
- Developed a Cryptocurrency Payment app & followed up with a Cryptocurrency Micropayment Chrome Extension - utilized React / Redux & JWT Authentication which was then integrated with teammate's back-end
- Collaborated with a global remote team - which included a Senior Developer & Product Manager

Twilio Air Quality Alert App
https://btam-twilio-aqi-alert.herokuapp.com
- Incorporated the Twilio API with React / Redux to send users custom Air Quality Index (AQI) alerts
- Integrated the Google Maps API with the World AQI API in order to display AQIs around the world
- Implemented Responsive Web Design (RWD) using Media Queries / LESS
